QUALITY ASSURANCE

We have gained immense popularity in the global market for our range of processed natural minerals. Available at the best industrial standards, these are accurate in composition and free from other contaminants. The high quality of the processed raw materials is due to our stringent quality testing throughout the various processing stages. The quality controllers in our unit ensure that processing is carried out in compliance with the best industry standards.

Parameters on which the final range is checked include:

- PURITY
- ACCURATE COMPOSITION

OUR TEAM

We have been able to carry out all the processes like procuring of raw material, processing, and quality checking, packaging and delivering in a streamlined manner due to our experienced professionals. The professionals engage themselves in meeting the industry demands and ensure that our customers get the best from us. Our potential employees have enabled us to smoothly procure process and deliver our range of product to a global client base.

CLIENT SATISFACTION

As our foremost objective, we endeavour to follow client centric measure, throughout our business activities. The result is quite clear with the growing list of our client base with esteemed names from across the globe. Clients being the mainstay of our organization, we ensure to meet their qualitative and quantitative demands for natural minerals. Further, our client centric approach also includes timely delivery of the product, easy payment options and safe packaging. It is due to this that we are able to maintain a wide client base across the globe.

CAPTIVE MINES

Having captive mines for almost all the industrial minerals we export / process. Our mine details are,

- a) Extent – 149 Ha
- Available grade – High silica, High TSI and Low Alumina
- Location – Thumukunta, YSR dt, Andhra Pradesh, India
- b) Extent – 3.67 Ha
- Available grade – High silica and High TSI
- Location – NP kunta, Andhra Pradesh, India

ABOUT OUR QUARTZ PROCESS

Raw materials are completely monitored by technical experts at the mine site to avoid possible foreign containment such as mud, clay and slits.

Further segregation done at stock yard / Processing units manually to avoid contaminations during transportation from mining site to stock yard / processing unit.

CHARACTERISTICS OF OUR QUARTZ

- High silica content ($\text{SiO}_2 > 99.5\%$)
- Low alumina content ($\text{Al}_2\text{O}_3 < 0.35\%$)
- Low iron content ($\text{Fe}_2\text{O}_3 < 0.30\%$)
- High thermal stability index (TSI . 85% for +19mn material)

TECHNICAL SPECIFICATION OF QUARTZ

S.No	PARAMETER	VALUE (APPROX.)
1	SiO_2	$> 99.5\%$
2	P	0.004%
3	Al_2O_3	0.17%
4	Fe_2O_3	0.17%
5	TSI	85%
6	Physical size	As per clients requirement

HighpowerV Import and Exports. Is into exporting commodities like Granite Monuments, grains, Pulses, sea food, Sugar etc and importing Illmenite, Iron Scrap, Nutmeg, Vanilla among others.

It was established in 1997 and the products are exported to more than 55 countries and the major buyer locations include USA, China, Singapore, UK, Germany, France, Japan and etc
